

Representation of Statistics

- Use appropriate graphs for appropriate data
- Graphs should be easy to read
- Use graphs with proper descriptions
- Avoid using pie charts
- Progression bar
- Summarize the data story/ background/ progression
- Relation to SDG explanation
- Data should roll back to no more than several decades

User friendly page

- An inviting webpage
- Page that is coherent/ understandable from all perspectives
- Prioritize general user and NGO as targeted customers
- Volunteering feature / reaching out to organizations
- Less focus on recruiting and more focus on raising awareness
- Getting feedback from users
- Attract business administrations and newcomers to Regina

Engaging design

- Interactive logos and design
- Easy to navigate through the pages
- Use dots and colors as indicators
- Making page compact and all-in-one type infos
- Don't List the elements randomly
- Prioritize visualization over data collection
- Random facts popups(side or top)
- Focusing on current issues rather than the ones fixed
- Information from multiple sites
- Add contact information from related sites

Side-features

- Make it look fun by adding quiz feature
- Recommendations or suggestions
- Continuous webpage maintenance
- Subscription feature
